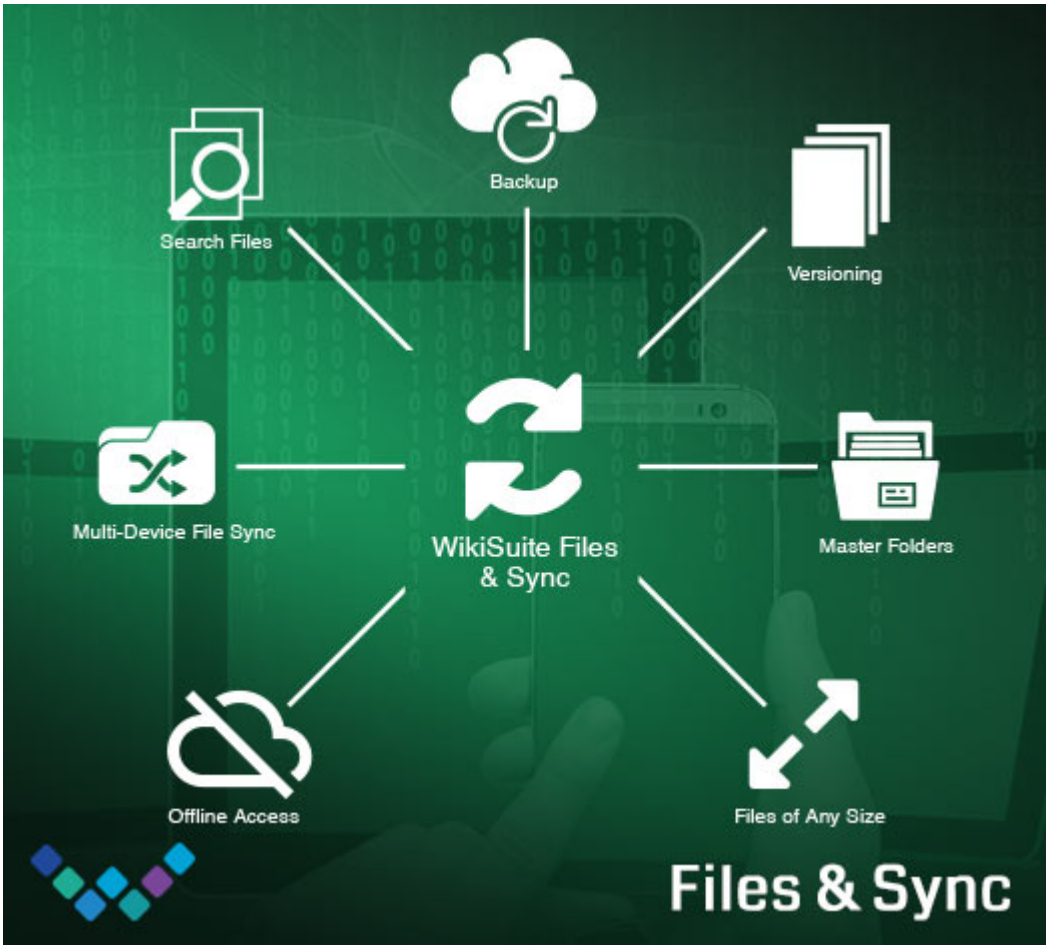
# Files and Syncing

## Take control of your data security, distribution, and safety

Storing, organizing, and sharing data files is an essential part of any organization today. WikiSuite includes a file management system that empowers its users to store and share files with others within the organization or with third-party resources securely and effectively.

Key capabilities include managing backups, file versioning, folders, and making data easily accessible. **Never lose an important file again!**



Work without any file size or quantity limitations. Never hand over your private data to any third-party service providers. Own your technology and data. All data transfers are encrypted and follow strict data privacy policies.

# Features

### Backup

- Automated backups
- Whenever backup device connects

### Versioning

- Archive old versions
- Folders configurable for versioning
- Automatically remove files from trash older than a specified number of days
- Control number of versions for a file

### Master Folders

- Protect files from being changed in master folders
- Override changes if master folder becomes out of sync

### Files of Any Size

- No limit on file size

### Search within Files

- The Tiki file galleries have handlers for .pdf, .doc, .xls, etc.

### Multi-Device File Syncing

- Securely connect multiple devices
- Auto-sync files when connected

### Offline Access

- Data available when offline
- Store data on your own machine
