# Spark

Spark is an Open Source, cross-platform IM client optimized for businesses and organizations. It features built-in support for group chat, telephony integration, and strong security. It also offers a great end-user experience with features like in-line spell checking, group chat room bookmarks, and tabbed conversations. Combined with the Openfire server, Spark is the easiest and best alternative to using un-secure public IM networks.

mark_demo: Hello Bill.
mark_demo: Yes, FastPath is installed as a plugin.
Bill Usher: Do I need to restart my Wildfire server after I install the plugin?
mark_demo: Actually, no. Once you install the plugin you will see a "FastPath" tab in the Wildfire server admin console.
