WikiSuite: The most comprehensive and integrated Open Source enterprise solution.

Pàdé
Pàdé (the "p" is pronounced explosively) is the Yoruba word for "Meet".

Pàdé is a unified communications web browser extension for Openfire. It embeds Converse.

Collaborate Efficiently

Discuss Converse.js

Joiner said 16:10
little cool

Matt: 16:14
Oh, very nice indeed

Pep: 16:42
interesting

ISS: 16:45
Thank you for your help with this (see issue) What I'm planning to do is to be able to add your app user and pass in

Meta: 16:53
If there's no need of multiple systems (e.g. a similar site or a web site and a mobile clients)

Please give me an idea if there's any license issues

> ISS: nice to hear that > How is it going, so far? Skool. Netcloud documentation super confusing

Joiner said 17:01
Next, perhaps you can learn something from how the JAX developers do things. For auth, they use the AFAR. https://github.com/piej

</p>

stripcloud-auth

ISS: 16:47
Please open the issue tracker

ISS: 19:59
First, I'll see if I can add the user and pass with js, you could then move to the HTML. Yes. https://github.com/piej

ISS: You can pass credentials directly to 'converse init', thereby avoiding embedding them in the HTML.

ISS: You can set 'WWW.Login' to true and then pass in the 'jid' and 'password' values. https://converse.org/docs/1.0/user-guide/

The room and anonymous

Joiner said 16:50
Dale, I think it's important to move

Discussion around Converse.js. The latest release is 1.3.4. Please be patient when asking questions, we're all in different time zones.

Dale Olajide 23:21
helps

Nigel Skeels 23:21
ok

Dale Olajide 23:30

Which of the berries listed below are berries you can pick in the wild?

- Blueberry
- Cloudberry
- Cocktail Cherry
