WikiSuite: The most comprehensive and integrated Open Source enterprise solution.

Pàdé

Pàdé (the "p" is pronounced explosively) is the Yoruba word for "Meet".

Pàdé is a unified communications web browser extension for Openfire. It embeds Converse.

Chick, very nice indeed.

pep: 16:42

Interesting.

ISA: 16:45

Thanks. Any help will be appreciated (see issues). What I'm planning with this is to be able to add your app user and pass in Netcloud so there's no need of multiple sign in (think direct org etc.) and point into Netcloud documentation super confusing 😏

johan: 17:11

Netcloud, perhaps you can learn something from how the JAXX guys do things. For auth, they use the AAF, https://github.com/pechard/spring-cloud-auth

ISA: 17:47

Please let me know if there's any license issues.

ISA: 17:59

Find the issue if I can embed the user and pass with jsscript into the HTML. Yes, https://github.com/wiki-cloud-converse/leaves/commit/85f915a6f2

Netcloud can pass credentials directly to 'converse.initiate', thereby avoiding embedding them in the HTML.

ISA: You can set 'wiki_login' to true and then pass in the 'jsscript' and 'password' values: https://conversejs.org/docs#configurable
