Projects

WikiSuite
The all-in-one information management tool for organizations.

WikiSuite Orchestrator
WikiSuite Orchestrator is to deploy, manage, monitor, aggregate data from and handle billing for a large number of WikiSuite instances. Each instance is an autonomous virtual machine, and can be moved to a different physical server. -> Orchestrator

WikiSuite SaaS platform template
For building your own vertical/niche SaaS service, multi-tenant or multi-sided market. -> SaaS platform template

WikiSuite Academy
Learn about WikiSuite. -> Academy

WikiSuite Building
Extending WikiSuite to buildings and hardware devices. -> Building
