Deployment scenario: Enterprise department

See also: WikiSuite for Enterprise Departments

Situation

- A department of a large organization
- All employees are supplied computers
- IT supplies some services (Email, shared drive), but not yet some others (Chat, videoconference, wiki, End-user development (EUD), etc.)
- Some team members working remotely, connecting in via the VPN

Requirements

- One virtual machine
- A sub-domain. Ex.: legal.example.com
- RAM: 3 gigs minimum for videoconferencing.

Typical needs

- Department portal
  - Wiki
  - Trackers (forms and databases, to reduce reliance on email)
  - End-user development (EUD) tools
  - Real-time collaboration (XMPP and WebRTC)
  - Blog
  - Calendar

Apps installed

Install apps depending on your use case:

- Virtualmin or if your organization mandates the use of Windows Server, please see How to install WikiSuite on Windows Server
- Tiki Wiki CMS Groupware
- Openfire
