

# How to configure ClearOS to permit Tiki Wiki CMS Groupware to search within files

The information is no longer updated. It may still be valid, or not. Anything relevant should be moved to the appropriate site. For anything related to ClearOS, please search among the following: [ClearOS site](#), [code base](#), [Developer docs](#), [Wiki](#) or [forum](#).

Please [contact](#) us if you would like to help out.

Tiki supports many file types natively (.docx, .pptx, .xlsx) and even .pdf starting in Tiki 18.x

However, some other file types require some additional utilities to be installed. Check the state of your server thanks to [Tiki Check](#)

Here are typical commands:

```
yum install catdoc
```

```
yum install elinks
```
