

WikiSuite: The most comprehensive and integrated Free / Libre / Open Source enterprise software suite ever developed

How to install Service Manager on ClearOS

The Services Manager app provides an overview of all services (daemons) running on your system. It is a convenient way to quickly see a high level overview of your server with respect to what services are running and set to start at boot.

How to install

Via the web interface

- Search for "Services" or "Manager" in the marketplace
- Scroll down to "Services"
- Install

Via the command line

```
yum install app-services
```

How to use it

From your ClearOs Control panel you can find this feature in the menu system at the following location:
System|Setting|Service Manager

WikiSuite: The most comprehensive and integrated Free / Libre / Open Source enterprise software suite ever developed

The screenshot shows the WikiSuite Services app interface. The top navigation bar includes 'DASHBOARD', 'MARKETPLACE', 'SUPPORT', and 'ROOT'. The main header has 'Community' and 'Services' tabs. The left sidebar lists various system components under 'System', with 'Services' selected. The main content area features a table of services and a sidebar with app details.

The Services app is used to control the system daemons and their running state and provides a useful overview. You can also control which services start up at boot time.

Service	Startup	Action
nscd	✓	Stop Disable
nslcd	✓	Stop Disable
fail2ban	✓	Stop Disable
dnsmasq	✓	Stop Disable
clearsync	✓	Stop Disable
snort	✓	Stop Disable
snortsam	✓	Stop Disable
mariadb	✓	Stop Disable
slapd	✓	Stop Disable
rh-php56-php-fpm	✓	Stop Disable
rh-php70-php-fpm	-	Start Enable
rh-php71-php-fpm	✓	Stop Disable
winbind	✓	Stop Disable

Services sidebar details:

- App Maintainer: Tim Burgess
- App Version: 2.1.7
- Support Policy: [Progress indicator]
- Buttons: Details, Uninstall, Rate App
