Screenshots

The screenshot displays the WikiSuite Pàdé web interface. At the top, a navigation bar includes tabs for Server, Users/Groups, Sessions, Group Chat, Plugins, Fastpath (highlighted in orange), Web Clients, and Meetings. Below this, a secondary bar shows 'Workgroups Manager' and 'Reports'. On the left, a sidebar contains links for 'View Previous Chats' and 'View Chat Usage'. The main content area is titled 'Chat Conversation' and features two sections: 'Conversation Metadata' and 'Chat Transcripts'. The metadata section lists details such as the question 'What is the meaning of life?', the user's occupation 'lost', and contact information for Joe Blogg. The transcripts section shows a log of chat messages, including room join/leave notifications and a meeting link shared by Frank Ozz.

[9:17 AM] Joe Blogg: Joe Blogg completed H5P.CoursePresentation in deleo/fire-13 and scored 0%
[9:18 AM] Frank Ozz has left the room
[9:18 AM] Joe Blogg has left the room

The image displays two web browser windows. The top window shows the Pàdé web browser extension interface. The header includes the Pàdé logo and a description: "Pàdé (the 'p' is pronounced explosively) is the Yoruba word for 'Meet'. Pàdé is a unified communications web browser extension for Openfire Meetings." Below the header, there are four main sections: "Quick Start" (How to get started quickly), "Features" (Chat/GroupChat, Audio/Video Conferencing, SIP Telephony and other features), "Support" (FAQs, issues and open source code), and "Security & Networking" (Security and Network Considerations). On the right side, there is a "Pàdé" sidebar with a "Message" input field and a "Send" button. The bottom window shows the Openfire Admin Console, specifically the "Swagger Chat API Documentation/Sandbox" page. The page title is "Chat API for Openfire Meetings" and it describes the "Chat API REST+SSE Documentation". The page lists several API endpoints: "Ask : For assistance (Fastpath)", "Blast : Blast messages to users", and "Chat : Perform presence, chat and groupchat operations". The "Chat" section is expanded, showing a list of endpoints: "GET /restapi/v1/chat/certificate" (Download a user client certificate), "DELETE /restapi/v1/chat/enroll" (Delete a TOTP user enrolment), "GET /restapi/v1/chat/enroll" (Get QR-Code for TOTP user enrolment), and "GET /restapi/v1/chat/rooms" (Retrieve a list of groupchat/muc rooms). The "Response Class (Status 200)" is shown as "OK". An "Example Value" is provided in a JSON format:

```
{  "mucrooms": [    {      "adminGroups": [        "string"      ],      "admins": [        "string"      ]    }  ]}
```
