

WikiSuite: The most comprehensive and integrated Free / Libre / Open Source enterprise software suite ever developed

XMPP chatrooms

New testing site: <https://wikisuite.chat/>

If your XMPP client [supports the standard](#), you should be able to join the room, by clicking here: <xmpp:WikiSuite@conference.wikisuite.chat?join>

If that doesn't work, add **conference.wikisuite.chat** as a conference server, and then joint the **WikiSuite** room

We will progressively host some XMPP chatrooms for various [Software Components](#).

Since XMPP is a federated protocol, you can just use your existing account. If you don't have an account, you can create a free one at <https://conversejs.org/>

To have your own firstname.lastname@wikisuite.net XMPP account, you need to ask an admin (such as Fabio or Serge) to create an account for you.

Openfire

- xmpp:open_chat@conference.igniterealtime.org?join
- More info: https://www.igniterealtime.org/support/group_chat.jsp

Pàdé

- <xmpp:pade@conference.igniterealtime.org?join>

Converse.js

- <xmpp:discuss@conference.conversejs.org?join>

JMAP

- <xmpp:jmap@jabber.ietf.org?join>
- logs: <https://www.ietf.org/jabber/logs/jmap/>

WikiSuite: The most comprehensive and integrated Free / Libre / Open Source enterprise software suite ever developed

XMPP

- <https://xmpp.org/community/chat.html>

How does this work?

For this service, we are using [Openfire](#) and [Converse](#). This is [Dogfood!](#)
