## Users / groups / permissions for ClearOS interop with Kimchi

Status

● Open

Description

Users / groups / permissions for ClearOS interop with Kimchi

Reported by

Marc Laporte

Priority

5 (low)

Area

ClearOS

Kimchi (including KVM)

Details

Version one of the app is one super user than controls everything that happens in Kimchi.

Todo: connect to ClearOS users and groups to Kimchi to permit things like the following permission examples:

- can create a virtual machine
- can use virtual machine
- can delete virtual machine
- can provide access to another user or group
- can download a snapshot
- etc.
