Description

Test FusionPBX with SQLite

Assigned to

Reported by

Marc Laporte

Priority

4

Area

ClearOS

FusionPBX (including FreeSWITCH)

Details

FusionPBX prefers PostgreSQL to MySQL/MariaDB, but ClearOS offers MySQL/MariaDB by default.

"SQLite is a great choice for an embedded system or small business it should not be used for multi-tenant systems that will be used in production."

Source: <https://www.fusionpbx.com/app/www/download.php>

This makes sense with the typical WikiSuite users so let's try SQLite
