Priority

1 (high)

Area

Realtime (Openfire/Jitsi Meet)

Details

Jitsi Meet has a rolling release model:

<https://github.com/jitsi/jitsi-meet/releases>

Openfire Meetings includes an older version. And it's quite a bit of work to update.

We are interested in many of the new features, notably:

- Firefox support
- <https://jitsi.org/Projects/YouTubeLive>
- Bootstrap

We are now keeping in sync with upstream Jitsi Meet. Well done Guus and Dele!
