Chat and Video Conference

No additional software required - connect from anywhere!

WikiSuite chat and video conferencing enables you to connect with employees, colleagues or clients from anywhere, using your existing desktop PCs, tablets and mobile devices. Optimize your teamwork and interactions with online video meetings, text support and more. WikiSuite Chat and Video Conferencing includes features from basic voice messages to group audio and video conferencing systems enhanced with collaborative meeting tools such as live screen share, auto switch-on voice detection, file exchange, session recording and archiving.

Unify your teams, connect them with WikiSuite

Effective and timely communication plays an important role in the success of any organization. WikiSuite provides advanced tools to connect with your team members in real time with audio, video, and text support. You need look no further for a secure and private multimedia communication platform for your organization.

Benefit from far more features for free than in high-priced proprietary software

You can work from your standard web browser. Add participants to a virtual meeting and an event will be created in the calendar and invitations will be emailed containing the meeting URL. Starting a virtual meeting is as easy as clicking a button, and participants can connect instantly from almost any Internet-connected device. Attendees can share slides and documents to work collaboratively, share screens, and much more during the online and **interactive meetings**.
