Community support

The WikiSuite community will be managed mostly as a combination of

- Wiki pages
- trackers
- Chatrooms
- But no forums (for now anyways)

What should be discussed here

- Discussions about WikiSuite (Vision, Roadmap, Governance, etc.)
- How to better organize wikisuite.org
- How to install WikiSuite or any of the components
- Procedures, "how tos" or similar
- Interoperability of software components in the context of WikiSuite

What should not be discussed here

- Any questions about one of the software components should be done on the forum of that project. This is to avoid fragmentation of the information.
