

Deployment scenario: Enterprise department

See also: [WikiSuite for Enterprise Departments](#)

Situation

- A department of a large organization
- All employees are supplied computers
- IT supplies some services (Email, shared drive), but not yet some others (Chat, videoconference, [wiki](#), [End-user development \(EUD\)](#), etc.)
- Some team members working remotely, connecting in via the VPN

Requirements

- One virtual machine
- A sub-domain. Ex.: legal.example.com
- RAM: 3 gigs minimum for videoconferencing.

Typical needs

- Department portal
 - Wiki
 - Trackers (forms and databases, to reduce reliance on email)
 - [End-user development \(EUD\)](#) tools
 - Real-time collaboration (XMPP and WebRTC)
 - Blog
 - Calendar

Apps installed

Install apps depending on your use case:

- [Virtualmin](#) or if your organization mandates the use of Windows Server, please see [How to install WikiSuite on Windows Server](#)
- [Tiki Wiki CMS Groupware](#)
- [Openfire](#)
