

# How to manually update Virtualmin Tiki Manager

The new installer at <https://gitlab.com/wikisuite/wikisuite-packages> will offer auto-updates, but if you installed before, you need to update manually:

## Virtualmin Tiki Manager

```
cd /usr/share/webmin/virtualmin-tikimanager  
git pull
```

If you get an error because your source code has been modified ("Your local changes to the following files would be overwritten by merge"), here is how to restore to the unmodified state:

```
git checkout -- .
```

If you get an error, about permission denied (public key) on GitLab. please see: <https://stackoverflow.com/a/58082435>

## Tiki Manager

```
cd /opt/tiki-manager/app  
php tiki-manager manager:update
```
