**JMAP**

Please see: blogpost16-WikiSuite-will-now-support-all-major-Linux-distros. While ClearOS's mail stack is powered by Cyrus IMAP, Virtualmin's mail stack is with Dovecot, so we will focus on efforts there (As of 2021-10-14, Dovecot doesn't support JMAP yet).

---

Cyrus 3.2 with JMAP support was released in May 2020.

2019-08-16: The specifications for JMAP Email have been published by the Internet Engineering Task Force (IETF), marking a big victory for email tools now and in the future.

2019-02-02: JMAP was presented at FOSDEM. Check out the video, and the slides with speakers' notes!

WikiSuite will add support for JMAP via a combination of contributions to Cyrus, Cypht integrated in Tiki Wiki CMS Groupware and the IETF standardization process. Please see: Cyrus IMAP 3 and JMAP development
