Jitsi Meet

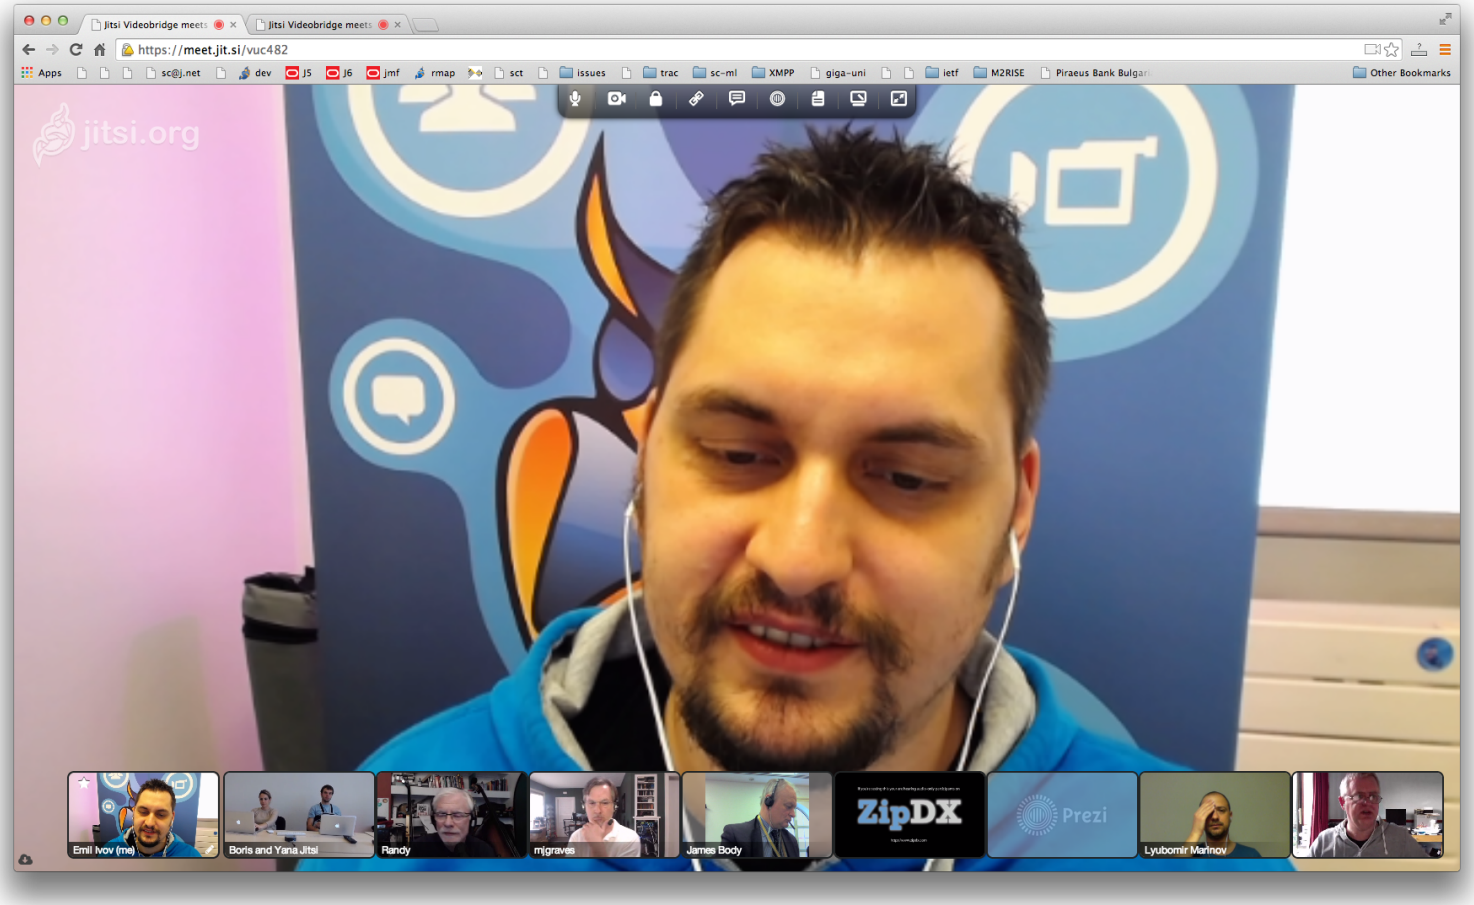

Jitsi Meet is a WebRTC-powered video conferencing platform that enables secure, high-quality group audio and video calls.
Fully open source under the Apache License 2.0, it is easy to self-host and ideal for organizations that require privacy, control, and strong integration capabilities.

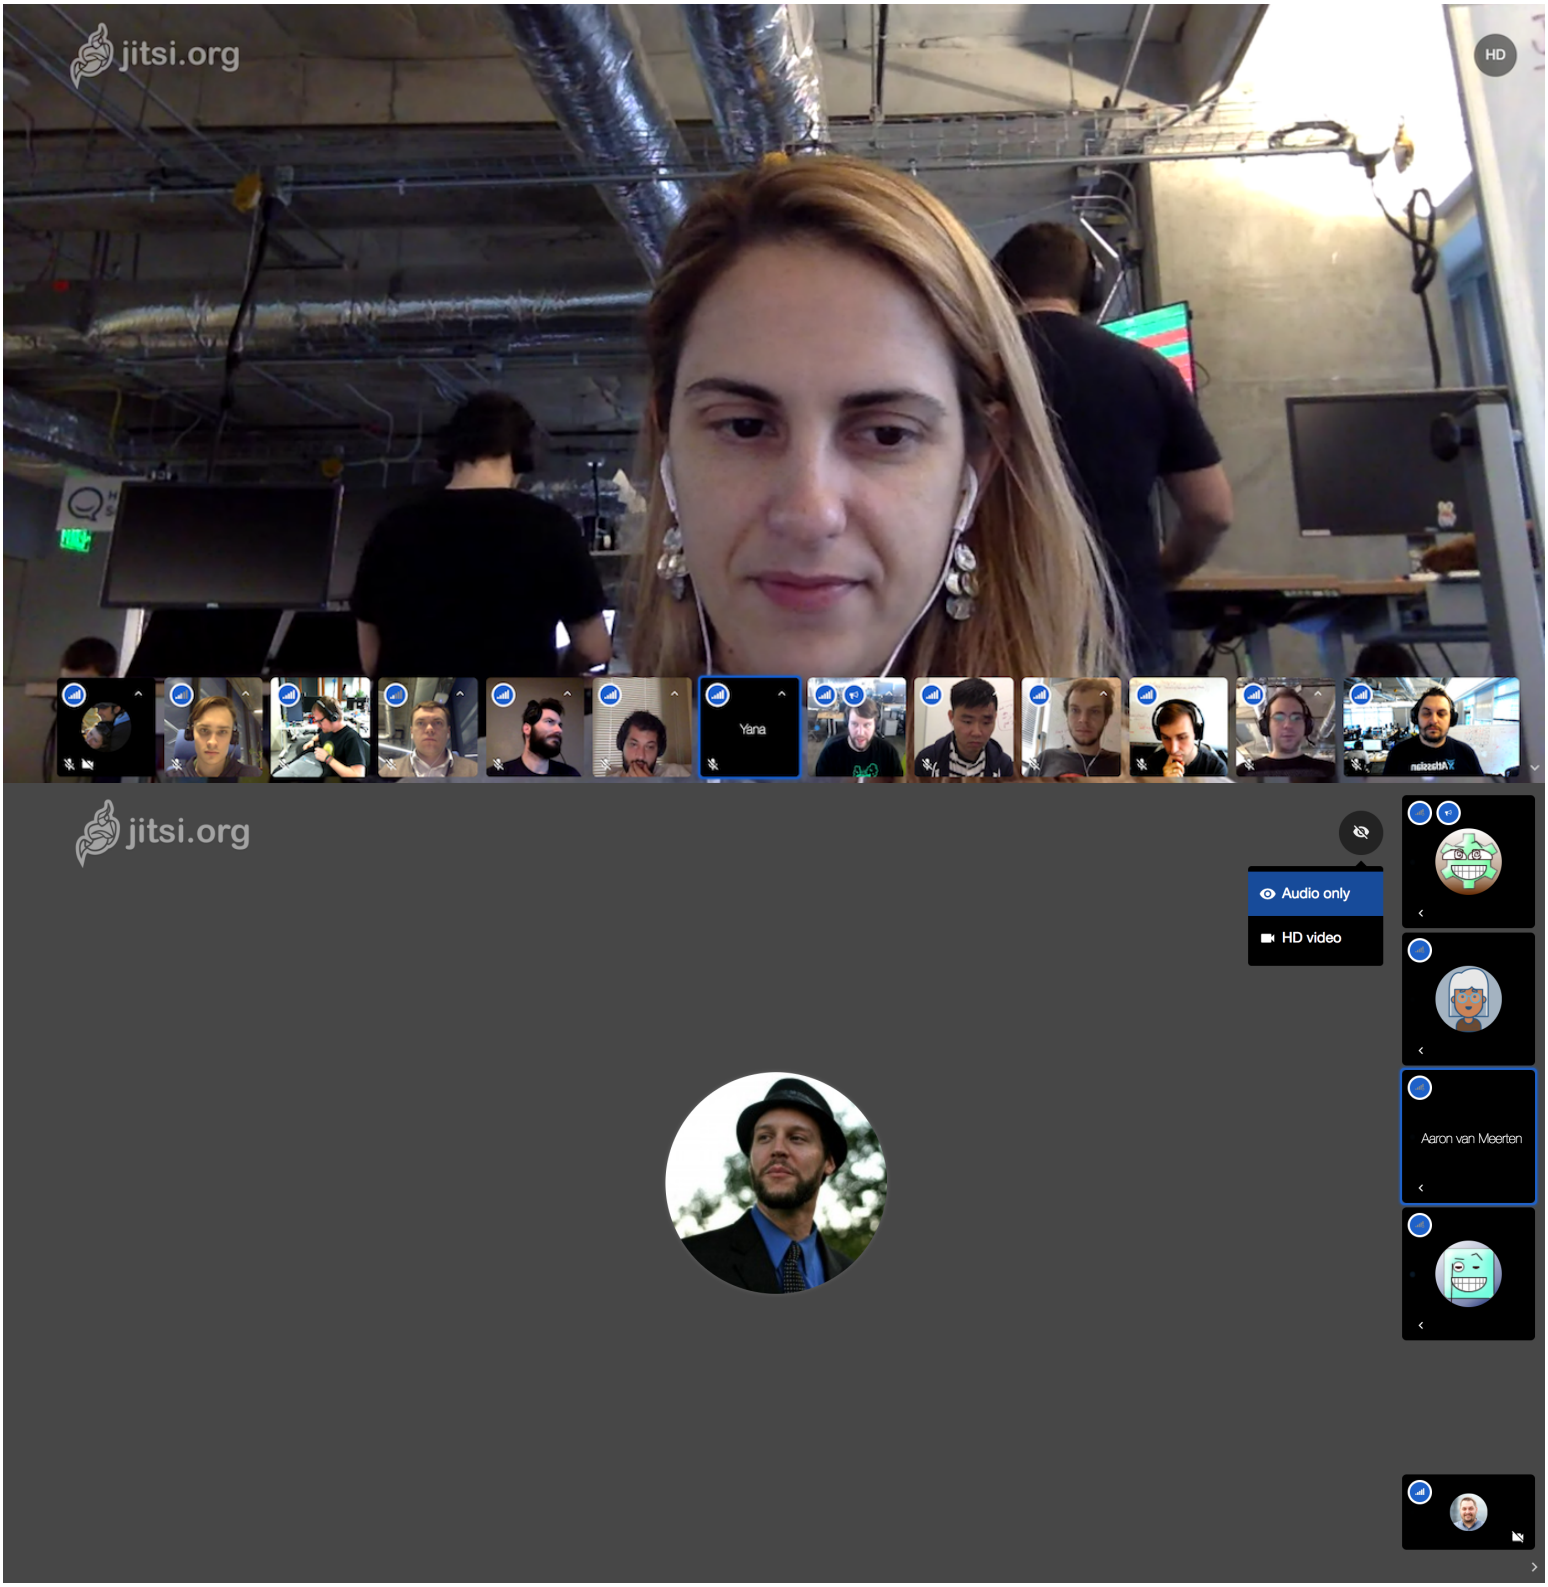

For a live demo, check out https://meet.jit.si/.
Please also check out the beta: https://beta.meet.jit.si/.

Key Features

- Unlimited & free video conferences with no time limits
- Secure meetings with encryption
- Screen sharing, chat, raise hands and reactions
- Polls
- Recording and livestreaming

More info at https://jitsi.org/Projects/JitsiMeet.

Jitsi Meet started in 2013, emerging from "Jitsi Desktop" which had started in 2003.
