WikiSuite: The most comprehensive and integrated Open Source enterprise solution.

Pàdé

Pàdé (the "p" is pronounced explosively) is the Yoruba word for "Meet".

Pàdé is a unified communications web browser extension for Openfire. It embeds Converse.

Discuss Converse.js

jordan: 16:39
Hi!

Matt: 16:40
Hello, very nice indeed.

jordan: 16:42
interesting

Isis: 16:45
Thanks! Any help will be appreciated (see issues) What I'm planning with this is to be able to add your email user and pass in nextcloud so there's no need of multiple sign ins (it's almost done or vendo at and private servers)

Please give me a trial if there's any license issues

ISS: 17:14
Well, maybe you can learn something from how the JIRA goes do things! For auth, they use the AAF-lk. https://github.com/picx

jordan: 17:14
Check out authlab.

ISS: 17:47
Please try with authlab

ISS: 19:59
Finally got it: I copied the user and pass with json into the HTML, Yes. https://github.com/twitter

Wednesday, July 6th, 2016

jordan: 20:50
ISS: You can pass credentials directly to 'converse.initiate', thereby avoiding embedding them in the HTML.

ISS: You can set 'with login' to true and then pass in the 'jid' and 'password' values. https://conversejs.org/docs#configurar

Etherlynk Product Summary

Etherlynk is a unified communications solution for regulated and unregulated de-centralised business communications.

When embedded or integrated with business applications, it creates a consistent timeline of financial transactions and supporting communication events side by side in a distributed ledger.

It enables enterprises to track their cost of communication in real-time and be more proactive when dealing with business compliance.
