WikiSuite: The most comprehensive and integrated Open Source enterprise solution.

Roadmap

WikiSuite is the most comprehensive and integrated **Free / Libre / Open Source** enterprise software suite.

Each component improves over time and below are specific areas that will be improved via the WikiSuite project. Join us to make this happen sooner!

See also: To do and Projects

Short term

- Make easy to install WikiSuite, which will drastically reduce the size of the installation guides.
- Set up a demo system, where visitors can have a fully running WikiSuite (ex.: acme.wikisuite.org) to evaluate.
- Finish up Marketing Plan including Slogans.
- Package Tiki Manager for Linux distros.

Medium term

- Improve as a CRM with integration of Email, Tiki and Openfire Meetings, with relevant reporting.
- Accounting ~~is quite basic and of alpha quality, so needs some work.~~ replaced by Dolibarr
- Marketing Automation -> https://dev.tiki.org/Marketing-Automation
- WikiSuite Orchestrator
- Source code management -> https://suite.tiki.org/Source-Control-Management
  - Interoperability with an existing app (ex.: Phabricator) or improving https://dev.tiki.org/Version-Control-Bridge
- Implement JMAP within Tiki

Long term

- WikiSuite Village
- Mesh Networking
- Offer functionality as Progressive Web Apps PWA for relevant use cases (ex.: Timesheet).
- Open Value Network
- ~~Human Resources (HR) management (Talent Management, etc.)~~ Dolibarr
- ~~Retail Point of Sale (PoS)~~ Dolibarr
- ~~Supply Chain Management~~ Dolibarr
- Add a GNU/Linux desktop distro to WikiSuite and work on auto-configuration and Provisioning.
  - or http://www.phoenixos.com/ or http://www.android-x86.org
- Chatbots
- Work with LinTo Open Source Personal Assistant for Enterprise.
