Set up email with Virtualmin and Cypht within Tiki

Create email account

Virtualmin > Edit User > Add a new user to this server

Configure email account to Tiki's webmail

Tiki integrates the Cypht webmail, which can aggregate email from many accounts, using standards: IMAP, SMTP, JMAP.

For more info, please see: https://doc.tiki.org/Webmail

To access Control panel
https://example.org/tiki-admin.php -> activate advanced preferences > enable Webmail +- or visit directly http://example.org/tiki-admin.php?page=webmail

Configuring webmail accounts
After enabling webmail from the features section of the admin panel you will be able to enter the webmail section from the application menu. In your first visit to the webmail you will be automatically redirected to the webmail configuration panel.

**Welcome to Cyphr**

Add a popular E-mail source quickly and easily

Add an E-mail Account

- You have 1 IMAP source
- You don’t have any POP3 sources
- You have 1 SMTP source
- RSS/ATOM services are not enabled for this site. Sorry about that!

Your timezone is set to Europe/Paris Update

**Help**

Cyphr is a webmail program. You can use it to access your E-mail accounts from any service that offers IMAP, POP3, or SMTP access – which most do.
