Tiki Wiki CMS Groupware

Started in 2002, **Tiki Wiki CMS Groupware** is a web application combining the features of a wiki, a content management system (CMS) and groupware. It is the free/libre and open source (FLOSS) web application with the most built-in features. It can be used to build all sorts of web applications: simple sites, complex portals, knowledge bases, intranets, extranets, and so on. The source code of Tiki is available under the LGPL version 2 software license. See also [Why Tiki Wiki CMS Groupware](http://tikitrackers.org). The most powerful and flexible feature is: [http://tikitrackers.org/](http://tikitrackers.org/)

Tiki is a key component of WikiSuite.
WikiSuite: The most comprehensive and integrated Open Source enterprise solution.

Control Panels

Tip
Enable/disable Tiki features in Control Panels » Features, but configure them elsewhere. See more options after you enable more Preference Filters above (✓).
