

Virtualmin Packages

The deployment version will lag weeks/months after releases of the source code on GitHub and be announced here: <https://forum.virtualmin.com/c/news/5>

Installer

- Source code: <https://github.com/virtualmin/virtualmin-install>
- Deployment: <https://software.virtualmin.com/gpl/scripts/install.sh>

Virtualmin

- Source code: <https://github.com/virtualmin/virtualmin-gpl>
- Deployment:
 - <https://software.virtualmin.com/vm/7/gpl/apt/pool/main/w/webmin-virtual-server/>
 - <https://download.webmin.com/download/virtualmin/?C=M;O=D>

Virtualmin Config

- Source code: <https://github.com/virtualmin/Virtualmin-Config>
- Deployment: <https://software.virtualmin.com/vm/7/gpl/apt/pool/main/v/virtualmin-config/>

Webmin

How to get latest Webmin before it's released to Virtualmin repos (releases are announced on <https://forum.virtualmin.com/c/news/5>)

A specific tested release version:

```
cd /tmp
wget https://github.com/webmin/webmin/releases/download/2.201/webmin_2.201_all.deb
apt-get install ./webmin_2.201_all.deb
rm -f webmin_2.201_all.deb
```

A nightly untested build (not recommended for production systems):

```
cd /tmp
wget https://download.webmin.dev/webmin-latest.deb
apt-get install -y ./webmin-latest.deb
rm -f webmin-latest.deb
```
