WikiSuite vs Cloudron

Cloudron and WikiSuite have some similarities. This page is to explain the differences and rationale of choices. You likely will be interested in the other alternatives to WikiSuite.

Similarities

- Both are FLOSS self-hosting platforms

Differences

Cloudron is more about helping self-host a selection of high quality apps (with more than one option for the same use case) while WikiSuite is about offering you an integrated solution (which you can self-host)

Questions

- To move towards a unified user experience, WikiSuite is working to move all components to Bootstrap. Does Cloudron have a similar initiative?
