

WikiSuite vs GoFAST

GoFAST and WikiSuite have some similarities. This page is to explain the differences and rationale of choices. You likely will be interested in the other [alternatives to WikiSuite](#).

Similarities

- Both are solutions targeted for the enterprise

Differences

- WikiSuite is Free / Libre / Open Source, while GoFAST has a community version (Open Source) and an enterprise version (Proprietary).
 - In GoFAST, some key features, like Workflows, Chat and web conferencing are only in the enterprise edition (Proprietary)
- GoFAST's center piece is Alfresco Community Edition
- GoFAST doesn't offer a mail server, while WikiSuite does: [Virtualmin](#)

Let's ignore the non Open Source parts, and investigate the GoFAST community edition: [the list of components of GoFAST3 on this page](#) is translated below:

OS	CentOS 7 64bits
CMS	Drupal 7
Web server and reverse proxy	Apache 2.4 (php-fpm)
Database	MySQL 5.7
Directory	OpenLDAP 2.4
Document Management System	Alfresco 5.2 Community
Search	Apache Solr 5
API Server	Apache Tomcat 7
Workflow	Bonitasoft Community 6

Some editorial comments on these choices

Component	Choice	Comment
OS	CentOS 7 64bits	Fine choice
CMS	Drupal 7	A powerful system, but prone to http://pluginproblems.com/ and is notoriously difficult to upgrade. Drupal 8 was released in November 2015 and Drupal 7 was released on in January 2011. Why use such as old version?

WikiSuite: The most comprehensive and integrated Open Source enterprise solution.

Web server and reverse proxy	Apache 2.4 (php-fpm)	Fine choice
Database	MySQL 5.7	ok, but a little odd since MariaDB is the default in CentOS 7.x
Directory	OpenLDAP 2.4	fine choice
Document Management System	Alfresco 5.2 Community	Notice that it's the community edition
Search	Apache Solr 5	fine choice
API Server	Apache Tomcat 7	fine choice
Workflow	Bonitasoft Community 6	Notice that it's the community edition

Overall: It's interesting because of a "suite mentality" to package everything and deal with internal complexities. But it falls short to be considered a true enterprise suite:

- Missing key components like email, chat, and video conferencing
- Two of the key components are community editions, and as such, any serious project will run into the limits of community editions of GoFAST **and** Bonitasoft **and** Alfresco.
- Given Alfresco is the center piece, there is a risk of too much focus on the file paradigm: [Files vs web pages](#)
