WikiSuite vs LibreOffice

LibreOffice and WikiSuite have some similarities. This page is to explain the differences and rationale of choices. You likely will be interested in the other alternatives to WikiSuite.

Similarities

- Both are solutions with features for the enterprise
- Both are Free / Libre / Open Source.

Differences

- LibreOffice offers a lot of features but it doesn't have the feature scope of WikiSuite. LibreOffice has a small subset of the features of Tiki Wiki CMS Groupware.
- LibreOffice's Spreadsheet is more advanced than Tiki's spreadsheet.
- LibreOffice is a descendant of OpenOffice.org, which is a descendant of StarOffice, which was originally released in 1985. This is a long time before the web and thus, it was designed to print documents (and not create web documents)
- LibreOffice is a desktop application which stores data in files and folders. See Files vs web pages. There are efforts to make LibreOffice available online, but this is complex to retrofit.
- Tiki Wiki CMS Groupware was first released in 2002, and is a native web application which stores data in a MySQL or MariaDB database.

Since was designed for the Web, its print capabilities were poor for a long time. But a lot work was invested and now Tiki offers very good PDF generation with mPDF

LibreOffice	WikiSuite
Writer – word processor	Tiki Wiki with or without WYSIWYG
Calc – spreadsheet	Tiki Spreadsheet (jQuery.sheet)
Impress – presentations	Tiki Slideshow (reveal.js)
Draw – diagrams	Tiki Diagrams (MxGraph / draw.io)
Base – database	Tiki Trackers
Math – formula editor	Tiki Calculations
Charts	Plotly

So basically, Tiki can do almost everything LibreOffice can. If you prefer, you can use LibreOffice and store data in the Tiki File Gallery

WikiSuite: The most comprehensive and integrated Open Source enterprise solution.
