Home Server

WikiSuite is typically installed on a dedicated or virtual server. What if you want WikiSuite on a home server?

- You can repurpose an old laptop or desktop
- You don't need a static IP address

The idea:
https://forum.virtualmin.com/t/investigating-for-a-solution-to-permit-self-hosting-without-a-fixed-ip-address-such-as-pagekite/116779

A recipe in testing: https://github.com/virtualmin/virtualmin-gpl/issues/462#issuecomment-1270798529

Domain names

You'll likely want your own domain name.

- https://Gandi.net offers two free email addresses with a domain name registration
- https://freenom.com/ is free on certain tlds like .tk, which is reminiscent but unrelated to Tiki Wiki CMS Groupware
