

How to configure Apache for Tiki Wiki CMS Groupware in ClearOS

2021-07-20: [WikiSuite will now support all major Linux distros](#). Thus, the information below is no longer updated. It may still be valid, or not. It will be eventually removed from this site, so anything relevant should be moved to the appropriate site. For anything related to ClearOS, please search among the following: [ClearOS site](#), [code base](#), [Developer docs](#), [Wiki](#) or [forum](#).

Please [contact](#) us if you would like to help out.

This is still brainstorming for now.

List all wishes and make a proper feature request on <http://tracker.clearfoundation.com> And document workarounds for now

- template error 500 pages with actionable info (if mod_security)
- template error 404 page which looks like the rest of the site and sends URL keywords to a suggested search
- [Tighter integration with Apache's >htaccess \(error messages, etc.\)](#)
