The Password Policy app is used to fine tune user password creation rules. This enforces users to create passwords that meet your criteria and helps to make your system more secure.

How to install

Via the web interface

- Search for "password" in the marketplace
- Scroll down to "password" App
- Install

Via the command line

`yum install app-password-policies`

How to access

In the ClearOS admin panel, navigate to System -> Account Manager -> Password Policies.
