

MeshCentral

The future of MeshCentral is at risk:

- <https://github.com/Ylianst/MeshCentral/discussions/4795>
- <https://github.com/Ylianst/MeshCentral/discussions/5257>
- <https://meshcentral2.blogspot.com/2023/02/starting-work-at-microsoft.html>

I urge everyone to join me in sponsoring Simon Smith (si458)!

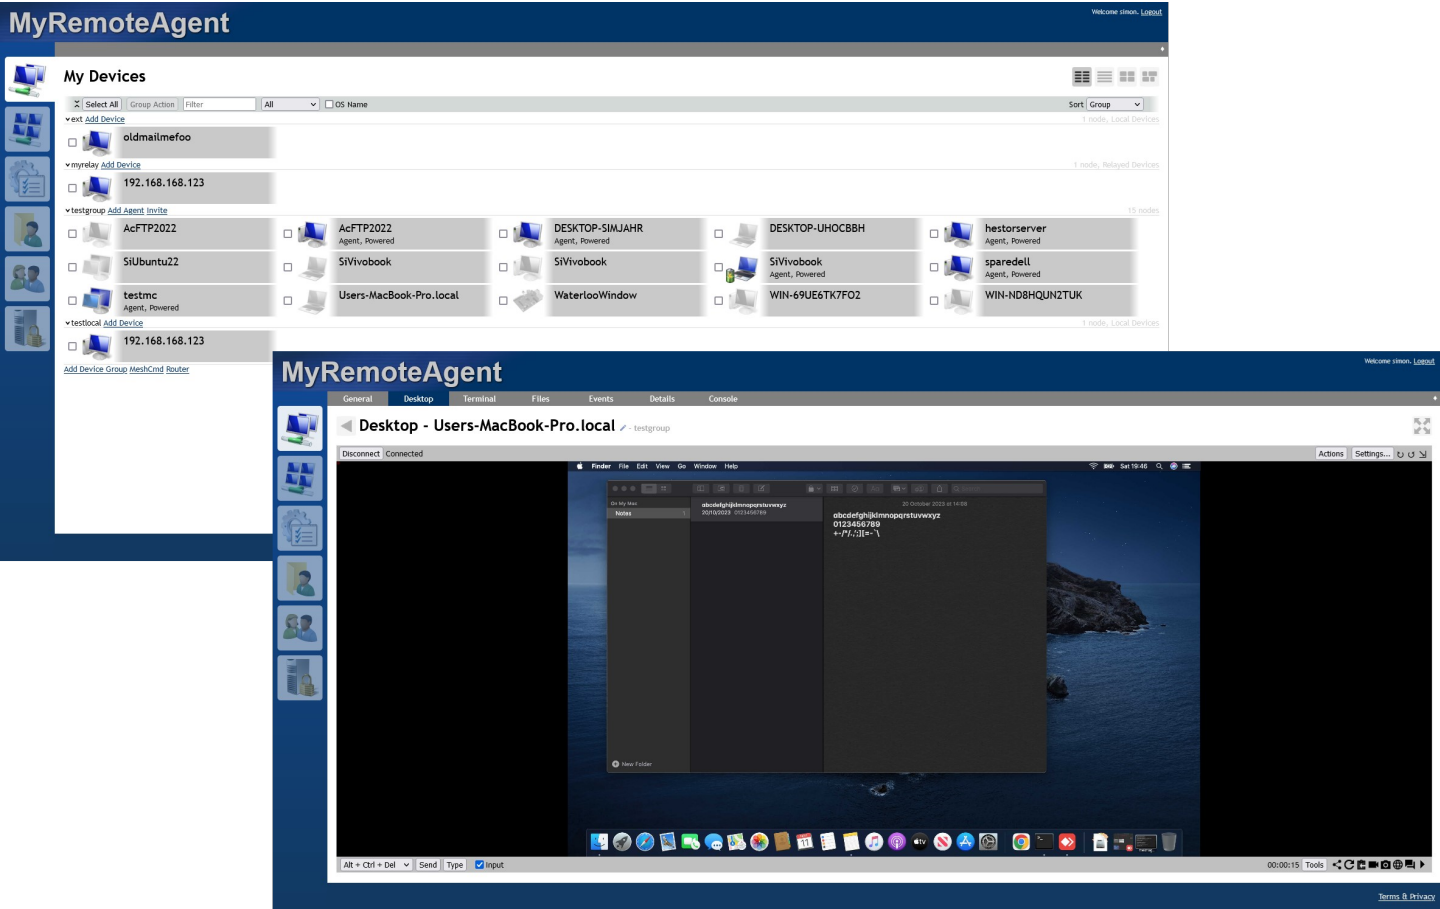

<https://github.com/sponsors/si458>

“

Probably by far the most amazing development when it comes to MeshCentral is the amazing work Simon Smith (si458) how submitted a lot of PR's and is motivating me to start moving forward with more updates. Thanks Simon for the ongoing work.

Started in 2008, **MeshCentral** is a free Open Source web-based remote computer management software. You could setup your own management server on a local network or on the internet and remote control and manage computers that runs either Windows* or Linux* OS. MeshCentral is one of the [components of WikiSuite](#).

Welcome

Connect to your home or office devices from anywhere in the world using [MeshCentral](#), the real time, open source remote monitoring and management web site. You will need to download and install a management agent on your computers. Once installed, computers will show up in the "My Devices" section of this web site and you will be able to monitor them and take control of them.
