The image displays two web browser windows. The top window shows the Pade web browser extension interface, which is a unified communications web browser extension for Openfire Meetings. It features a dark header with the Pade logo and a description: "Pade (the 'p' is pronounced explosively) is the Yoruba word for 'Meet'. Pade is a unified communications web browser extension for Openfire Meetings." Below the header, there are four main sections: Quick Start, Features, Support, and Security & Networking. The Quick Start section includes a link to "How to get started quickly". The Features section lists "Chat/GroupChat, Audio/Video Conferencing, SIP Telephony and other features." The Support section includes a link to "FAQs, issues and open source code". The Security & Networking section includes a link to "Security and Network Considerations". On the right side of the Pade interface, there is a "Pade Openfire Meetings Client" window showing a chat log for Tuesday Sep 4th 2018, with messages: "Visitor has entered the room", "Topic set by", and "How may we assist?".

The bottom window shows the Openfire Admin Console, specifically the "Swagger Chat API Documentation/Sandbox" page. The page title is "Chat API for Openfire Meetings" and the subtitle is "Chat API REST+SSE Documentation". It lists several API endpoints and their operations:

- Ask : For assistance (Fastpath)** - Show/Hide, List Operations, Expand Operations
- Blast : Blast messages to users** - Show/Hide, List Operations, Expand Operations
- Chat : Perform presence, chat and groupchat operations** - Show/Hide, List Operations, Expand Operations

The "Chat" section lists the following endpoints:

- GET** /restapi/v1/chat/certificate - Download a user client certificate
- DELETE** /restapi/v1/chat/enroll - Delete a TOTP user enrollment
- GET** /restapi/v1/chat/enroll - Get QR-Code for TOTP user enrollment
- GET** /restapi/v1/chat/rooms - Retrieve a list of groupchat/muc rooms

The "Response Class (Status 200)" section shows the following JSON structure:

```
OK
Model Example Value
{
  "mucRooms": [
    {
      "adminGroups": [
        "string"
      ],
      "admins": [
        "string"
      ]
    }
  ]
}
```
