- [Boss Ibrahim Mussa Gregoire opened merge request !37: \[FIX\] missing file or directory on sub server at WikiSuite / Virtualmin Tiki Manager](#) (2024-04-28)
After creating a sub-server, and create an instance, we get an error Failed to install script : Failed to open `**/tikiconfig/prefs.ini.php**` for writing : No such file or directory, while it on the sub-server. So, proposition is to create the prefs file it does not exist before trying read file that does not exist. Related task

Removing these 2 closing brackets seems like a conflict resolution issue - won't you introduce parse errors this way?
- [Boss Ibrahim Mussa Gregoire commented on merge request !35 at WikiSuite / Virtualmin Tiki Manager](#) (2024-04-24)
Resolved!
- [Marc Laporte accepted merge request !58: \[ENH\] Enabled AWStats by default at WikiSuite / WikiSuite Packages](#) (2024-04-22)
