

WikiSuite: The most comprehensive and integrated Free / Libre / Open Source enterprise software suite ever developed

WikiSuite is the most comprehensive and integrated Free / Libre / Open Source enterprise software suite.

- **Comprehensive**: WikiSuite offers most (over 80%) of the data and information management features all organizations need.
- **Integrated**: The end goal is that all parts of WikiSuite look and act consistently. One login for everything, one search box for everything, and so on. We still have quite a way to get there, but we are closer than the other FLOSS offerings, and have a realistic [roadmap](#) to get there. A key reason is that our [main web component](#) is the FLOSS web application with the most built-in features.
- **Free / Libre / Open Source software (FLOSS)**:
https://en.wikipedia.org/wiki/Free_and_open-source_software.
- The **enterprise suite** category is for solutions for organizations that cover more than 10 traditional software categories in an integrated fashion (for example, logins work throughout all features, etc.). Software categories differ depending on the source and evolve over time - [here is a typical example](#).

According to the [Constructive Cost Model \(COCOMO\)](#), WikiSuite's "cost to develop" is well over **\$US50 million**.

WikiSuite fares well in comparison to the [alternatives](#), which you may also be interested in investigating.
