WikiSuite vs Google

Google started out with indexing and organizing publicly accessible data, and later added all kinds of tools to manage organizational and personal data. The main source of revenue is advertising.

WikiSuite can be seen as a FLOSS

self-hosted alternative to G Suite (aka Google Apps). So for most of the tools that Google offers to manage your **organizational data** (including personal data in the case of home/family use), WikiSuite has an alternative. However, WikiSuite is not in the game of indexing public data, although something like DuckDuckGo or YaCy could be added later on.

Similarities

- Both are full-featured platforms, with a high level of integration to manage organizational data

Differences

- Google is proprietary SaaS while WikiSuite is Free / Libre / Open Source software.

Organizational data

Google	WikiSuite
Gmail	Tiki Webmail, powered by Cypht
Calendar	Tiki Calendar
Docs	Tiki Wiki with or without WYSIWYG
Sheets	Tiki Spreadsheet
Slides	Tiki Slideshow

Tasks	Tiki Trackers or Tiki Tasks
Google+	Tiki can be configured to make your own Social Networking
site Groups	Tiki Forums
YouTube	Kaltura

Public data

Google	WikiSuite
Search	We won't do search of public data, but for all your internal data: we have a search engine, including Search within files and increasingly some Natural Language Processing (NLP) features.
News	Tiki can aggregate news via RSS: Article Generator Similar to Alerts, Tiki offers Stored Search.
Maps	Tiki Maps can use Google Maps but also OpenStreetMap and others thanks to OpenLayers.
Google Shopping is a price comparison tool, which WikiSuite doesn't offer.	But Tiki does offer a Shopping Cart.
Similarly, WikiSuite doesn't offer functionality like Google Wallet	but Tiki does offer a Payment feature, and a system to track Credits.
Blogger/Blogspot	Tiki Blog

Other

Google	WikiSuite
ChromeOS	Lubuntu
Play	F-Droid
Chrome	Firefox
Chrome Remote Desktop	MeshCentral
SketchUp	WikiSuite doesn't offer anything but WebGL is on the radar!
