WikiSuite vs Open365

Open365 and WikiSuite have some similarities. This page is to explain the differences and rationale of choices. You likely will be interested in the other alternatives to WikiSuite.

As of 2018-06-19, Open365 has not had a code commit since 2016

Similarities

- All FLOSS
- Designed for self-hosting

Differences

- Open365 is mostly desktop software made available via HTML5, whereas WikiSuite is mostly made of web apps.
- WikiSuite has more features. See Tiki features (just one component of WikiSuite) vs Open365 features.
- Open365 has a free hosted service (great for testing), whereas for WikiSuite, you need to install locally.

Questions

- Is Open365 is an open community?
- To move towards a unified UI, WikiSuite is working to move all components to Bootstrap. Does Open365 have a similar initiative?
