## Investigate for a solution to permit self-hosting without a fixed IP address (such as PageKite)

Status

● Open

Description

Investigate for a solution to permit self-hosting without a fixed IP address (such as PageKite)

Reported by

Marc Laporte

Priority

4

Area

Virtualmin

Details

Virtualmin can be set up on a home server. But then, you need manage dynamic IPs.

But DNS changes are not in real time. How could we have a better option?
