On hold until we decide about https://dev.tiki.org/TRIM+Revamp

Also, we could make a Piwik Package: https://doc.tiki.org/Packages from
https://packagist.org/packages/piwik/piwik

WikiSuite: The most comprehensive and integrated Open Source enterprise solution.

Marc Laporte 2018-07-25 21:04

As of now, it is no longer planned that we will make a ClearOS app.

Matomo (like Google Analytics) is a tool to get web visitor information using a snippet of JavaScript in each page, and it makes nice stats and reports.

In the WikiSuite context, we control the server and all the apps. We have better data than Matomo or Google Analytics could ever get.

So we will explore how we can leverage this data. We definitely need to improve on reporting.
