Tiki Wiki CMS Groupware
ClearOS (deprecated)

Details
Workaround is to upgrade to
http://wikisuite.org/How-to-install-PHP-5-6-on-ClearOS
http://wikisuite.org/How-to-install-PHP-7-on-ClearOS

~~As of 2016-04, setting up a non-standard version of PHP breaks the access to phpMyAdmin~~ fixed in latest 7.x

Long term solution is to offer multiple versions in the GUI, via Software Collections (SCL) or otherwise.

We need more recent versions of PHP-CLI as well (this is easy to do with Software Collections).
