Description
Test FusionPBX with SQLite

Assigned to

Reported by
Marc Laporte

Priority
4

Area
ClearOS (deprecated)
FusionPBX (including FreeSWITCH)

Details
FusionPBX prefers PostgreSQL to MySQL/MariaDB, but ClearOS offers MySQL/MariaDB by default.

"SQLite is a great choice for an embedded system or small business it should not be used for multi-tenant systems that will be used in production."
Source: https://www.fusionpbx.com/app/www/download.php

This makes sense with the typical WikiSuite users so let's try SQLite
