Permit Openfire Meetings to anonymous users for certain rooms

Status

🟢 Open

Description

Permit Openfire Meetings to anonymous users for certain rooms

Reported by

Marc Laporte

Priority

2

Area

Realtime (Openfire/Jitsi Meet)

Details

https://meet.jit.si/ is great because it's simple to just share the URL

However, Openfire Meeting requires everyone to login. This is great for team, but it should be possible to also have wide open rooms to meet with people outside the organization.

There is a setting for this. What we want: Registered users can create rooms, that are then accessible to anonymous for a while, but not forever.

WikiSuite: The most comprehensive and integrated Open Source enterprise solution.
